Windermere Foundation Awards \$2,250 to Innovative Services NW for The Listening Therapy Project

Vancouver, WA - Innovative Services NW is proud to announce a \$2,250 grant from the Windermere Foundation to Innovative's Pediatric Therapy and Neurodevelopmental Center for the purchase of Listening Therapy Equipment. *Listening Therapy* has been found to help improve brain function, reduce stress, and it trains the brain for the auditory skills needed to effectively listen, learn, and communicate. It affects and improves skills in seven brain focus areas including communication, auditory processing, social/emotional, stress response, motor coordination and creative expression. This generous grant funding provides half the funds required to make offering this therapy a reality for the children we serve.

Thank you to the Windermere Foundation!

Innovative Services NW is a 55-year-old Vancouver-based nonprofit. Their Pediatric Therapy and Neurodevelopmental Center provides occupational, physical, speech, and educational therapies and specialty services including feeding, intensives, incontinence, and sensory integration therapies, orthotics and equipment fitting for children, birth through age 20..
